

THE HOME & BIZ INTEGRATION COMPANY™

The Global Home Integrator

Changing the way people work and live in their homes

featuring

Higgins - The Home CIO

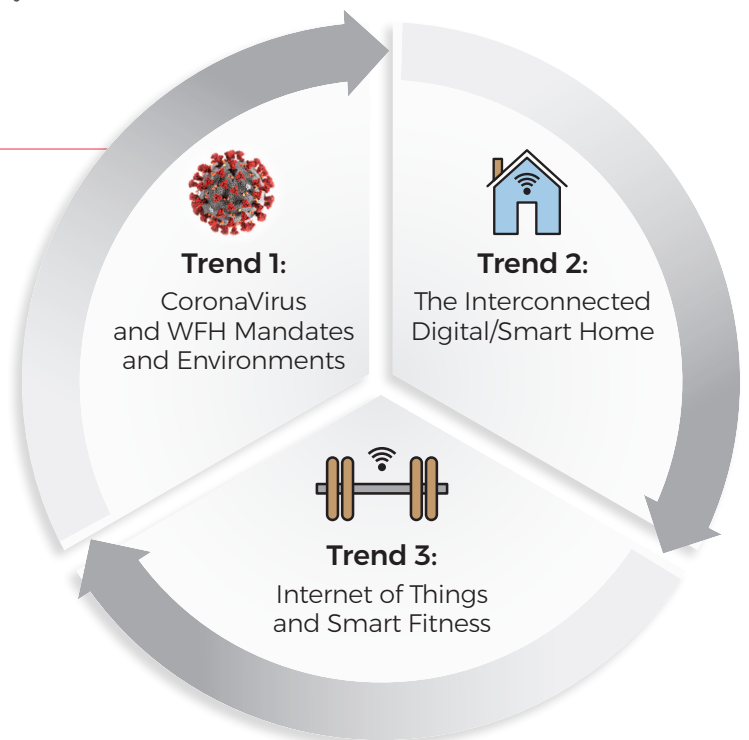

AI enabled Training, Support, and Education from Hi

Hi™ is changing the way people work and live in their homes through the creation of the first **Global Home Integrator**.

Interconnected Megatrends

Developed by leaders in the business systems integration and home audio and electronics market to create a new type of company to service the always-on digital home and Work-from-home (WFH) market.

The Problem & The Opportunity

Today's home is not equipped with the proper technology and support infrastructures to sustain new work-from-home requirements.

Simple Wi-Fi based accessed networks from a cable provider will not provide the reliability, security, and performance required.

The rate of new technology in the home (Computer-TV-Audio-Lighting-Alarm) has outpaced the ability to properly consume and utilize it.

Today there is no national service and solutions provider dedicated to the home to support the demands of the Digital WFH Lifestyle.

hi Integrated Product Lines

hiFoundation

Accelerated & Secure Monitored Home Network

hiWellness

Integrated lighting, HiFoundation network, audio, devices & monitor

hiLife

Audio & Entertainment integration + HiFoundation network

hiHomeOffice

Hi Foundation + Device and Security Integration
